SAMSARA™ + Vantage Point

Location, Safety, and Performance. Together in One View.

Best-in-class hardware meets real-time operational performance. Built for mining and aggregates operations.

SAMSARA™

Connected Operations

- **Location Tracking**
  Real-time equipment location
- **Safety Monitoring**
  Driver, equipment, and site safety events
- **Equipment Hardware**
  Connected hardware across the operation
- **Real-Time Equipment Data**
  Continuous data from the field

Vantage Point

Operational Performance

- **Fleet Performance**
  Real-time production performance
- **Cycle Times**
  Operational cycle visibility
- **Equipment Utilization**
  See how equipment is being utilized
- **Operational Context**
  Connect events with what's happening in the operation

Location, safety, and performance usually live in separate systems.
Now you can see them together in one connected view.

LOCATION + PERFORMANCE

Know where equipment is and how it's performing.

Connect Samsara location data with Vantage Point's real-time operational performance.

See equipment location and performance together without switching between separate systems.

One location. One performance view.

SAFETY + CONTEXT

Give every safety event operational context.

Connect Samsara safety events with Vantage Point performance data from the same moment.

See what was happening operationally when an event occurred, not just the alert itself.

Move from standalone alerts to actionable context.

ONE CONNECTED VIEW

Stop checking two systems to answer one question.

Bring Samsara hardware data and Vantage Point operational performance into the same view.

See location, safety, and performance together without another hardware deployment.

One view. Less cross-referencing.

From Insight to Impact

SAFETY EVENTS
Safety events tied directly to operational context.

LOCATION ACCURACY
Location data connected directly to fleet performance.

NO NEW HARDWARE
Built for existing Samsara customers. It's a data connection, not a new deployment.

SEE THE CONNECTED OPERATION IN ACTION.
Request a personalized walkthrough.
